## Cool upgrade for your home office: the Black Edition colour pencils

We all know this: an inspiring environment makes us all equally productive. The more comfortable we feel, the more creative we can be. This also applies to work in the home office. True energy boosters are stylish utensils that harmonise perfectly with the home ambience - like the Black Edition colour pencils from Faber-Castell. Matching the hip All Black trend from the interior design sector, they now provide cool decorative objects for a casual upgrade in the living room and study. And their look hits the bull's eye: the dark barrel allows the bright colours to set the stage, further enhancing their radiance.

But for decoration purposes alone, the stylish edition is definitely too good to go it alone, because it has even more to offer: The pens are made of high-quality wood from sustainable forestry, fit perfectly in the hand with their ergonomic triangular shape and guarantee fantastic creative results: Thanks to the supersoft lead, the brilliantly bright colours come out especially well, even on dark or coloured paper.

Black Edition colour pencils, **6,00 EUR to 18,00 EUR**
