Artist ink "to go": Pitt Artist Pen Dual Marker

Ink has always been very popular with artists, for example because it can be combined with many other painting techniques, such as watercolour. Whereas the use of conventional tools used to involve a certain amount of effort, the Pitt Artist Pen offers the finest artist's ink in a practical drawing pen - and has been one of the most successful products in the Faber-Castell artists' range for almost two decades. It also allows you to create spontaneously anytime and anywhere.

The new artist's ink marker enables creative professionals even more flexibility to turn ideas into reality: Pitt Artist Pen Dual Marker is the name of the double-ender that has two different tips. The soft and flexible thick brush tip is suitable for fine to thick lines as well as larger areas, depending on the variation in tip guidance. The metal-cased fibre tip (0.8 mm) is designed for precise drawing and outlining. The highly pigmented water-based ink is lightfast and does not bleed through paper - ideal for creative work in sketchbooks, for example.

The artist's ink marker *Made in Germany* is available in 30 bright colours, either as a single pen or as a set in four different cardboard cases.

Single pen: 4 EUR; box of 5/10/20/30: 20 EUR, 40 EUR, 80 EUR, 120 EUR.

Available from October 2022.
