

Glitter magic: Connector paint box unicorn edition

This innovation adds a touch of magic to every motif: inspired by the dazzling unicorn designs that fascinate kids so much right now, Faber-Castell has added rainbow glitter from the tube to the Connector paint box. Little artists who love unicorn glitter can use the colourful sparkle finish to decorate the tail or mane of their self-painted mythical creature, for example - and, of course, to add a sparkle to any other scenery. For this purpose, the limited edition contains twelve bright, high-yield standard colours in the tried-and-tested pluggable individual pens and a tube with rainbow glitter. The colours can be easily mixed in the palette integrated in the lid. Sweet extra goodie: Each Connector paint box comes with a unicorn sticker sheet.
